All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without permission in writing from the publisher.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, SALEM, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee of U.S. $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purpose, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors in the U.S.A. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the U.S. Copyright Law.

Contents

Volume 117 (1983)

Mutagenicity of bis- and mono-(2,3-dibromopropyl)phosphate, and their salts used as flame retardants, in the Salmonella/microsome system
by Akitada Nakamura, Noriyuki Tateno, Tomoko Iwata, Shigeo Kojima, Masa-aki Kaniwa and Taro Kawamura (Tokyo and Yokohama) 1– 8

Mutagenicity of bleomycins, phleomycins and tallysomycins in *Salmonella typhimurium*
by D.M. Podger and G.W. Grigg (Sydney) 9– 19

Mutagenicity of dichloroacetylene and its degradation products trichloroacetyl chloride, trichloroacryloyl chloride and hexachlorobutadiene
by D. Reichert, T. Neudecker, U. Spengler and D. Henschler (Würzburg) 21–29

Microbial mutagenicity of 3- and 4-ring polycyclic aromatic sulfur heterocycles
by Richard A. Pelroy, Dorothy L. Stewart, Yoshinori Tominaga, Masamoto Iwao, Raymond N. Castle and Milton L. Lee (Richland and Provo) 31– 40

Mutagenicity in *Salmonella typhimurium* TA98 of the serum extract of the organic matter derived from airborne particulates
by Nobuyuki Takeda, Kiyoshi Teranishi and Kokichi Hamada (Kobe) 41– 46

Mutagenicity of methyl nitrite in *Salmonella typhimurium*
by M. Törnqvist, U. Rannug, A. Jonsson and L. Ehrenberg (Stockholm) 47– 54

Induction at high frequency of a unique phenotypic class of *Bacillus subtilis* mutants by methylxanthines
by L.E. Sacks and Keiko Mihara (Berkeley) 55– 65

Induction of retrovirus gene expression by selenium compounds
by Ralph J. Rascati (Normal) 67– 78

Mutagenicity of antiamebic and anthelmintic drugs in the *Salmonella typhimurium* microsomal test system
by C. Cortinas de Nava, J. Espinosa, L. Garcia, A.M. Zapata and E. Martínez (México) 79– 91

Determining the mutagenic activity of a tar, its vapors and aerosols
by J.M. Penalva, J. Chalabreysse, M. Archimbaud and G. Bourgineau (Pierrelatte) 93–104

Conversion of Congo red and 2-azoxyfluorene to mutagens following in vitro reduction by whole-cell rat cecal bacteria
by Thomas M. Reid, Kenneth C. Morton, Ching Y. Wang and Charles M. King (Detroit) 105–112

Modulation of aromatic amine mutagenicity in *Salmonella typhimurium* with rat-liver 9000 *g* supernatant or monolayers of rat hepatocytes as an activation system
by Jørn A. Holme, Lise Timm Haug and Erik Dybing (Oslo) 113–125

Studies on the mutagenicity of commercial preparations of the food colour Red 2G after purification or oxidation
by C.N. Edwards and R.D. Combes (Portsmouth) 127–134

0165-1218/83/$03.00 © 1983 Elsevier Science Publishers B.V.

Anti-mutagenic effects of coumarin and umbelliferone on mutagenesis induced by 4-nitroquinoline 1-oxide or UV irradiation in *E. coli*
by Toshihiro Ohta, Kazuko Watanabe, Masaaki Moriya, Yasuhiko Shirasu and Tsuneo Kada (Tokyo and Mishima) 135–138

Mutagenicity of some organophosphorus compounds at the *ade6* locus of *Schizosaccharomyces pombe*
by J. Gilot-Delhalle, A. Colizzi, J. Moutschen and M. Moutschen-Dahmen (Liège) 139–148

Induction of reverse mutation and mitotic gene conversion by some metal compounds in *Saccharomyces cerevisiae*
by Indira Singh (Hissar) 149–152

The pattern of damage to the oogenetic series of cells after a single feeding of *cis*-diamminedichloroplatinum to Habrobracon females
by Daniel S. Grosch and Wendy O. Segreti (Raleigh) 153–162

Sister-chromatid exchanges and cell kinetics in human and rabbit lymphocytes exposed in vivo and in vitro to 2-bromo-α-ergocryptine
by Osvaldo Mutchinick, Ma. E. Gonsebatt, Lizbeth Ruz, Patricia Mauleón, Rubén Lisker and Roberto Lichtenberg (México) 163–171

Cytogenetic activities of a triazine herbicide in root tips of *Allium cepa* and *Vicia faba*
by A. Badr (Tanta) 173–182

Studies on the mutagenic activity of ascorbic acid in vitro and in vivo
by E.P. Norkus, W. Kuenzig and A.H. Conney (Nutley) 183–191

Mutagenicity of oxytetracycline
by Donata Blitek, Krystyna Pieńkowska, Hanna Gajcy and Jadwiga Koziorowska (Warsaw) 193–199

Mutagenicity studies with the mouse spot test
by E. Gocke, D. Wild, K. Eckhardt and M.-T. King (Freiburg/Breisgau) 201–212

Mutagenicity of 3 structurally related epoxides, with defined stereochemical configuration, in *Saccharomyces cerevisiae* and in V79 Chinese hamster cells
by G. Turchi, C. Bauer, G. Bronzetti, L. Citti, C. Corsi, G.F. Fassina, P.G. Gervasi, A. Lippi, R. Nieri and A. Abbondandolo (Pisa) 213–224

Studies on mutagenicity of 2 bronchodilators under development in Cuba
by Miguel A. Jiménez, Marta Torroella, Salomé Ivonne Fernández and Rolando Pellón (La Habana) 225–236

Mutagenicity of 2 anti-chagasic drugs and their metabolic deactivation
by R. Nagel and I. Nepomnaschy (Buenos Aires) 237–242

Comparative genotoxic effects of the cooked-food-related mutagens Trp-P-2 and IQ in bacteria and cultured mammalian cells
by L.H. Thompson, A.V. Carrano, E. Salazar, J.S. Felton and F.T. Hatch (Livermore) . 243–257

The optimal design of batteries of short-term tests for detecting carcinogens
by John E. Heinze and Neil K. Poulsen (Scottsdale) 259–269

Non-mutagenic nitroheterocycles
The lack of correlation between bacterial mutagenicity and one-electron reduction potential
by George D. Hartman and Richard D. Hartman (West Point) 271–277

Genetic effects of chromium compounds
by V. Bianchi, L. Celotti, G. Lanfranchi, F. Majone, G. Marin, A. Montaldi, G. Sponza, G. Tamino, P. Venier, A. Zantedeschi and A.G. Levis (Padua) 279–300

Induction of sister-chromatid exchanges in human lymphocytes by indirect carcinogens with and without metabolic activation
by Kiyoshi Inoue, Tadayoshi Sibata and Tatsuo Abe (Osaka and Kyoto) 301–309

Cytogenetic effects of quinoxaline-1,4-dioxide-type growth-promoting agents
II. Metaphase analysis in mice
by Rostislav Čihák and Markéta Vontorková (Pardubice-Rosice) 311–316

Induction of sister-chromatid exchange by 5-substituted 2′-deoxyuridines
by Jean Jacques Cassiman, Erik de Clercq and Herman van den Berghe (Leuven) 317–327
Cytogenetic effects of pesticides
II. Induction of micronuclei in mouse bone marrow by the insecticide gardona
by Soheir M. Amer and Maha A. Fahmy (Cairo) 329–336
Evaluation of propylene oxide from mutagenic activity in 3 in vivo test systems
by Bryan D. Hardin, Ronald L. Sculer, Patricia M. McGinnis, Richard W. Niemeier and Randall J. Smith (Cincinnati) 337–344
Dominant lethal studies in male mice after exposure to 2.45 GHz microwave radiation
by R.D. Saunders, S.C. Darby and C.I. Kowalczuk (Chilton) 345–356

Contents, Vol. 117 (1983) 357–359

Errata 360

The Author Index and the Subject Index covering all volumes to appear in 1983 will be published as a separate issue by the end of the year.
